- HTML
- HTML5
- DBMS
- Materialized CSS
- Android Studio
- Web Development(Front End)

✦ Objective

I seek challenging opportunities where I can fully use my skills for the success of the organization.

🎓 Education

St.John's Sr.Sec.School   *2014*
10
70.4

A.V.M.D INSTITUTE   *2016*
10+2
68.2

BABU BANARASI DAS NATIONAL INSTITUTE OF TECHNOLOGY AND MANAGEMENT   *2020*
B.TECH
75.31

🚀 Projects

TIC TAC TOE

It can be developed only through AWT api, but i used here swing framework.

Rules of the Game

The player whose turn is first has the choice to mark X or O to one of the nine squares , Here we choose X for first player .
Second player then mark its symbol O in the remaining 8 squares
The thumb of the rule is to make the three successive square grids of the same sign , it does not matter whether they are horizontal , vertical or diagonal , they just need to be three consecutive squares filled with same symbol X or O.

Internship Portal Website

I worked on internship portal website using materialize css and bootstrapping.

Online Medical Pharmacy

My Final year project online medical pharmacy.

- User can view details of the medicines without going anywhere.

- It is convenient for users as this system provides accurate cost and description of the system.

- The website is flexible to be used and for e-shopping.

- User can view different categories of product of different pharma company at a single place.
